

My Dearly Beloved Friends,

God bless you all with peace, joy, happiness, good health and prosperity at all times!

I was happy to have spoken to you all the other day on virtually.

I apologize my delay I writing to you due to several unforeseen reasons.

As we all know and underwent the pandemic Covid 19 worldwide, we have witnessed many lost their lives and challenged the medical systems we trusted due to unpredicted vicissitudes. The other impacts such as economic and social disruption went up beyond the reported information in the media.

We have witnessed that many people were at risk of being unwaged and repentant. The common people were unable to feed themselves and their families. For most of the people adequate income means no food or at best less food and less nutrition.

The pandemic has been affecting entire organization, food system, as borders were closed with restrictions due to uprising case and the rapid spread of the virus.

There was also trade restrictions even ordinary farmer wasn't allowed to sell their crops, the fishermen weren't allowed to sell their catch. How terrible was the situation! Amidst all these the frontline workers jeopardized as they were compromise won life for the redemption reestablishment of the health of the civilians. Our schools were given as first line treatment center for Covid patients'. Ambulances were driven every day bringing people in and out from the villages.

Migrant workers from north India were particularly vulnerable, because they face risks in their transport, working and living conditions and struggle to access support measures put in place by authorities. Guaranteeing the safety and health of all the workers from all segments such as, farm at the school, utility staff, staff from hotel, daily workers that were supporting the smooth functioning of daily lives and activities were in critical condition and at risk in such a way one would weep and cry looking at their eyes and faces. They would at the end wanted to go home by all means! We had to organize those flights through possible stop over's to their destination.

Can't imagine the conditions of other people working in the neighboring villages for their daily bread! The media reported that due to restrictions even people took the chance of walking back to their home for kilometers, some of them even have lost their lives on the way! Very vulnerable conditions!

With the pandemic impacting everyday life, no schools and everything in online, we provided mobiles phones for those who could not afford to buy for their learning. As we adopt to these unprecedented circumstances, we continue to serve our communities as best we can by giving by conducting medical camps, awareness programs on health, nutrition, hygiene, positive thoughts, distribution of essentials, expanding farming, helping people in need.

We used human hands from the community to work in the ground to produce the most of the eatables' items from the available ground we have. Also the big machines were also used to till the ground to remove rocky stones. It keeps the community till today healthy by our community food system. We acknowledge with gratitude the education provided by you in identifying, sending volunteer senior experts for education in organic farming, training and teaching our communities and students.

We are doing everything possible to sustain daily operations and provide services to our community, inmates and employees. While there's a lot of uncertainty, we know that we need to adapt fast to our changing reality.

Now, more than ever, our community needs us. And we need you, your friendship, your commitment, your expertise, and your skills, to bring difference in to the lives of our community. The candles are burning for you, your families, dear ones, our friends and for the whole world every day together with our humble prayers.

As the present situation is out of our control, we're dedicated to finding ways to serve our community, projects and hope to resume things as best we can together forever with love.

At the same time we are rethinking the future of our environment, tackle climate change and environmental degradation with ambition and haste. Only then can we protect the health, livelihoods, food security and nutrition of all people especially of our families and communities to ensure that our 'new normal' is a better one.

Let's all not forget of the fact that Creation is the pure manifestation of the Creator. Therefore, together with you we are there to educate, raise our community to be part of the better world creating heaven on earth wherever we are, with our efforts and attitude.

We thank you for your continued commitment, support, magnanimity, wish you, your families, friends, neighbors, institutions, enterprises, your community, good health, peace, joy, happiness, Grace and prosperity in the days to come.

With gratitude

Your brother

Frederick Thomas
